Best Unit Protocol Adherence

16 Days Above Your Goal

Turn protocol adherence of 85% has been shown to significantly reduce hospital acquired pressure injuries.1 Literature shows hospitals have a baseline turn protocol adherence between 38%2 to 52%.3

* Estimates are based on industry standard pressure injury rates (published by Bergquist-Beringer et al. 2013 and Bauer et al. 2016) and results (published by Pickham et al. 2017).
