

# Leaf Mobility Continuum

	 <b>Patient Unable to Move Without Assistance</b>	 <b>Patient Able to Sit</b>	 <b>Patient Able to Stand</b>	 <b>Patient Able to Walk Less Than 50 Feet</b>	 <b>Patient Able to Walk More Than 50 Feet</b>
Patient Risk Factors	<ul style="list-style-type: none"> <li>Hospital-Acquired Pressure Ulcers</li> <li>Hospital-Acquired Pneumonia</li> <li>Orthostatic Intolerance</li> <li>Hospital-Associated Deconditioning</li> <li>DVT/PE</li> </ul>	<ul style="list-style-type: none"> <li>Hospital-Acquired Pressure Ulcers</li> <li>Hospital-Acquired Pneumonia</li> <li>Hospital-Associated Deconditioning</li> <li>DVT/PE</li> <li>Falls</li> </ul>	<ul style="list-style-type: none"> <li>Hospital-Acquired Pressure Ulcers</li> <li>Hospital-Acquired Pneumonia</li> <li>Hospital-Associated Deconditioning</li> <li>DVT/PE</li> <li>Falls</li> </ul>	<ul style="list-style-type: none"> <li>+/- Hospital-Acquired Pressure Ulcers</li> <li>Hospital-Acquired Pneumonia</li> <li>Hospital-Associated Deconditioning</li> <li>+/- DVT/PE</li> <li>Falls</li> </ul>	<ul style="list-style-type: none"> <li>+/- Hospital-Acquired Pressure Ulcers</li> <li>Hospital-Acquired Pneumonia</li> <li>Hospital-Associated Deconditioning</li> <li>+/- DVT/PE</li> <li>Falls</li> </ul>
Orders & Interventions	<ul style="list-style-type: none"> <li>Turn protocol</li> <li>HOB elevation</li> </ul>	<ul style="list-style-type: none"> <li>Turn protocol</li> <li>HOB elevation</li> <li>OOB to chair</li> <li>Seated repositioning</li> <li>Fall prevention protocols</li> </ul>	<ul style="list-style-type: none"> <li>Turn protocol</li> <li>HOB elevation</li> <li>OOB to chair</li> <li>Seated repositioning</li> <li>Fall prevention protocols</li> </ul>	<ul style="list-style-type: none"> <li>Turn protocol</li> <li>HOB elevation</li> <li>OOB to chair</li> <li>Seated repositioning</li> <li>Fall prevention protocols</li> <li>Daily ambulation goals</li> </ul>	<ul style="list-style-type: none"> <li>+/- Turn protocol</li> <li>HOB elevation</li> <li>OOB to chair</li> <li>Seated repositioning</li> <li>Fall prevention protocols</li> <li>Daily ambulation goals</li> </ul>
Leaf Features	<ul style="list-style-type: none"> <li>Monitors and records all patient turns, including adequate patient self-turns</li> <li>Monitors patient's upright angle</li> <li>Notifies staff when interventions are needed</li> <li>Provides detailed analytics at patient, unit, and hospital levels</li> </ul>	<ul style="list-style-type: none"> <li>Monitors and records all patient turns, including adequate patient self-turns</li> <li>Monitors patient's upright angle and duration of each upright event</li> <li>Tracks time spent in seated chair position and alerts when repositioning is necessary</li> </ul>	<ul style="list-style-type: none"> <li>Recognizes when a patient stands</li> <li>Automatically suspends turn protocols while standing, and resumes them when patient returns to bed or chair</li> </ul>	<ul style="list-style-type: none"> <li>Assesses and records number of steps taken, distance traveled, time spent ambulating and number of ambulation events</li> <li>Details of each ambulation event are automatically documented</li> </ul>	<ul style="list-style-type: none"> <li>Assesses and records number of steps taken, distance traveled, time spent ambulating and number of ambulation events</li> <li>Details of each ambulation event are automatically documented</li> </ul>
Leaf Benefits	<ul style="list-style-type: none"> <li>Drives higher levels of adherence to patient turn and head of bed protocols</li> <li>Real-time actionable data allows for sustained high performance</li> <li>Reduces HAPU</li> </ul>	<ul style="list-style-type: none"> <li>Alerts staff when seated patients need repositioning to relieve pressure</li> <li>Drives higher levels of adherence to seated patient offloading protocols</li> </ul>	<ul style="list-style-type: none"> <li>Alerts staff when a fall risk patient stands or ambulates</li> <li>Turn protocol suspension while ambulating reduces unnecessary staff-assisted turns</li> </ul>	<ul style="list-style-type: none"> <li>See a patient's real-time status and progress along their prescribed mobility protocol</li> <li>Automatic documentation of Early Mobility After Surgery (ERAS) and other progressive mobility programs</li> </ul>	<ul style="list-style-type: none"> <li>Track improvement in ambulation level over the course of a patient's hospitalization</li> <li>Documentation helps determine achievement of mobility levels appropriate for discharge with low risk of readmission</li> </ul>
